

TACKLING PROBLEMATIC SINUSITIS: MODULE-BASED SOLUTIONS

COURSE HIGHLIGHTS

- The course will highlight personalized diagnosis, endotyping, medical therapy and surgery, as well as a live surgical prosection.
- New to this year is a workshop on Functional Nasal Surgery which will cover septal perforation repair, nasal valve and caudal septal surgery.
- A hands-on flexible nasal endoscopy workshop is optional for those wishing to incorporate that into their practice.
- A session devoted to cutting-edge rhinosinusitis session is also offered optionally.

COURSE OVERVIEW

This annual three-day meeting will absolutely change how you view and manage problematic sinus disease. We invite you to incorporate novel innovative and personalized approaches in the care for problematic sinusitis patients. World leaders from otolaryngology-rhinology, allergy immunology and basic sciences will address the most challenging aspects of managing sinusitis. The program includes talks and brainstorming sessions led by our world class faculty. We will bring you the latest in applications, opinions, and recommendations of problematic sinonasal disease and share practical tips in optimizing outcomes from medical and surgical interventions. Highly interactive sessions with audience participation for those seeking a deeper understanding beyond the obvious and easy.

PAST REGISTRANT QUOTES

- Very clinically oriented and practical to the point presentations.
- Clearly met the objective of identifying, optimizing and treating those patients with this difficult disease.
- I have a better understanding of the pathophysiology. I will better identify these patients before initiating treatment protocols.
- An excellent course I would highly recommend for better patient care!

**MAYO CLINIC EDUCATION CENTER
PHOENIX, ARIZONA
MARCH 22–24, 2018**
